EDUCATION

Bachelor of Computer Engineering Umm Al-Qura University

08/2023

My GPA 3.11/4

PROJECTS

Bunya App,Construction-client communication Application (04/2023)

- Flutter app that connects construction companies offering interior design, electrical services, and building materials, enabling clients to access them quickly and reliably for home construction or renovation needs.

Saed App,Pill Management Application (03/2024)

- Flutter app that helps people manage their medication accordingly as well as asking about health to an advanced AI

JANNIB,Smart management for storing Warehouse Hajj and Umrah buses(Graduation Project) (06/2023)

- I have programmed an intelligent system and linked it to hardware devices to organize the parking spaces for buses during the Hajj season through an integrated automated system that replaces the human workforce.

WORK EXPERIENCE

Summer Training

Wadi Makkah/First City Company

07/2023

Makkah

First City Company is a firm that provides customized innovations and software solutions for startups.

Tasks

- Working with Teltonika tracking devices and extracting data from them using Python.

Tuwaiq Academy

Flutter Boots-camps trainee

01/2024 - 04/2024

Riyadh

- During the Flutter Bootcamp, I've gained a lot of experience in app development using the flutter framework and dart programming language, as well as a handful of other skills like API handling, SQL Database management with supabase, and also implementing many customized app features according to customer requirements.
